

Mercy High School

Annual Parent Asbestos Notification

TO: Mercy High School Parents

FROM: Mercy Administration

DATE: September 30, 2009

Mercy High School has had an Asbestos Management Plan prepared in compliance with the USEPA Asbestos Hazard Emergency Response Act (AHERA). This plan and subsequent updates are available for inspection Monday through Friday during normal school hours in the Main School Office.

In August, 2007, a Three-year Re-inspection, required by the AHERA regulation, was conducted by a Michigan Accredited Asbestos inspector to re-evaluate the condition of asbestos containing materials at the facility.

The Three-Year Re-inspection or Surveillance review also evaluated Operations and Maintenance procedures that will keep asbestos materials in good condition.

If you have any questions, please contact Mr. Will Gervais, Associate Principal, our designated person for asbestos activities.
