FutureSWE

The next generation of bright and capable female engineers

FutureSWE is an all-day event for high school girls interested in learning about engineering in an interactive environment. With the help of mentors from Wayne State's College of Engineering student organizations, participants will learn about engineering through challenging hands-on activities. Participants will learn about a range of engineering disciplines through engaging activities including creating chocolate asphalt, balloon cars, artificial lungs, and more!

FREE registration with
breakfast, lunch, and parking
included

Gain inspiration from the next
generation of women
pursuing STEM careers

Learn innovative cutting edge
skills ranging from android
programming to constructing
drug delivery models

Parallel sessions for parents
to learn how to prepare
students to study STEM fields

Work one on one with
mentors from WSU's several
engineering organizations
