

THE RIVETERS TEAM 1481

Join The Mercy Robotics Team! We're Looking for a Few Good Women

The Mercy Riveters FIRST Robotics Team 1481 is recruiting new members for our upcoming season.

This is a great opportunity for Mercy students to learn about engineering, robotics, coding, business, marketing, and more! Did you know?

- Students have fun competing with a robot they designed and built in an arena filled with their adoring fans. Competitions come with a live DJ and optional dancing!
- No prior experience necessary! Professional engineers and business leaders teach and help make student dreams come true.
- We accept all Mercy students and their siblings (9th-12th grade).
- More than \$80 million in scholarships is available through organizations that support FIRST Robotics.
- Our team has been able to place interested Seniors into paid engineering internships after high school graduation.
- Many of our students pursue lucrative engineering and computer science careers that have average starting salaries up to \$69,000.

- Our Riveters learn teamwork, gracious professionalism, and public speaking skills.
- For more information, contact Lead Mentor Mark Hansen at mdhansen4@gmail.com.
